

Overview: Maine Supports Intensity Scale for Adults® (SIS-A®)

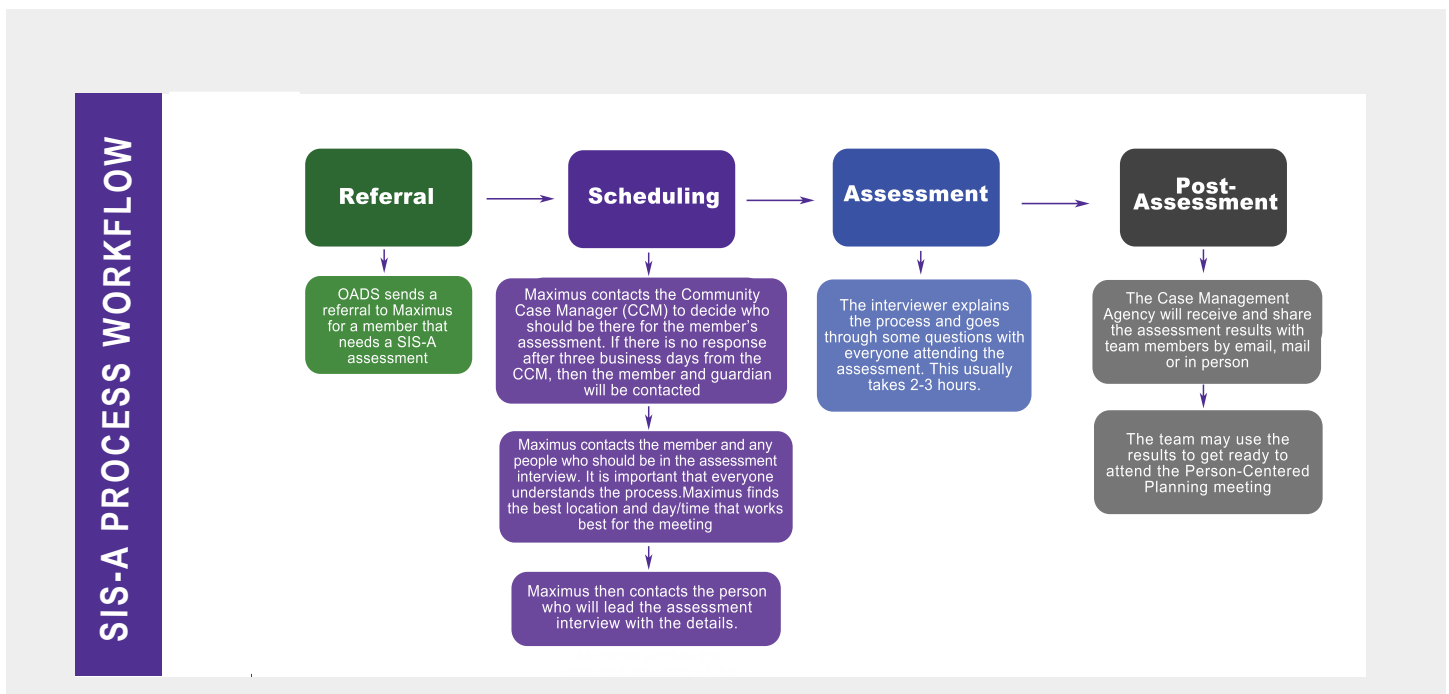

The State of Maine – Office of Aging and Disability Services (OADS) recently started a new needs assessment process. This assessment is called the Supports Intensity Scale for Adults (SIS-A®), 2nd edition. This process is managed by State partner, Maximus.

What is the SIS-A and why is it important for members?

The SIS-A assessment is a tool created by the American Association on Intellectual and Developmental Disabilities (AAIDD). It measures the support a member needs in a number of areas. These areas include home living, community living, health and safety, learning, work, and other areas of life. The information gathered from the assessment will help members plan. Through planning, members can reach their own goals.
