

Process Updates: Changes to Census Tracking Tools

Throughout the spring, the AssessmentPro development team has been working on several important changes tied to census tracking and designed to streamline processes and expand current options. These include a series of updates completed in early March to the **PathTracker Census Activity Report**, as well as a series of upgrades for the **Census Report** that are planned for mid-May.

Continue below for details on these various changes so that you're aware of the changes and new functionalities. You can also download a helpful [AssessmentPro User Guide - Running Census Reports](#).

PathTracker Census Activity Report

Updated March 3, 2026

Admission Activity has been added. Previously the report was focused on Discharge/Transfer Activity.

The report name changed to the PathTracker Admission and Discharge Activity Report. If this report is not visible for you now, it will be added in the coming weeks in time for the Census Report changes detailed below.

Census Report

Updates planned for May 12, 2026

The report name is changing to PathTracker Census Report.

The focus of the report is changing to tracking the NF Census for a given period (e.g., month or week). Admission activity can now be obtained from the PathTracker Admission and Discharge Census Activity Report.

By leaving the "Current Census Only" box unchecked, users can obtain a census from the past. By checking the box, users can obtain the current NF census.

Individuals will be included if they were present in the NF at any time during the selected date range. If they discharged during

that time, the discharge date will be included in the report.

Download New User Guide

As you plan for the changes noted above, be sure to download this helpful new resource for future reference.
