

## AssessmentPro

### Process Updates: Changes to Census Tracking Tools

---

Throughout the spring, the AssessmentPro development team has been working on several important changes tied to census tracking and designed to streamline processes and expand current options. These include a series of upgrades for the **Census Report** that are planned for mid-May.

Continue below for details on these changes so that you're aware of the changes and new functionalities. You can also download a helpful AssessmentPro User Guide - Running Census Reports.

---

#### Census Report

##### *Updates planned for May 12, 2026*

The report name is changing to PathTracker Census Report.

The focus of the report is changing to tracking the NF Census for a given period (e.g., month or week). Admission activity can now be obtained from the PathTracker Admission and Discharge Census Activity Report.

By leaving the "Current Census Only" box unchecked, users can obtain a census from the past. By checking the box, users can obtain the current NF census.

Individuals will be included if they were present in the NF at any time during the selected date range. If they discharged during that time, the discharge date will be included in the report.
